

Rheumatic Sufferers!

There's Real Relief In Every Bottle

Rheumatism, in its many forms, is a disease that is to be dreaded. Not only is the disease a very painful one, but medical authorities tell us that a large percentage of cases of rheumatism, if neglected, sooner or later become incurable. When this stage of the disease is reached, about the best the sufferer can hope for is something that will temporarily ease the pain. The sufferer may linger for a number of years, enduring all the time great pain and agony.

One great disadvantage of rheumatism is the persistency of the disease. The pain, soreness and swelling affects first one joint or part, and then another—and at times it may seem that the whole body is racked with pain. The poisons are accumulating all the time in the blood and the whole system is being gradually undermined, eventually making the sufferer a pitiful, helpless cripple.

Medical authorities acknowledge that rheumatism is one of the three or four diseases that afflict the human family which are difficult to successfully control and relieve. Many other diseases yield to their treatment, but so far no real medicinal preparation for rheumatism has been discovered or used by them. The average doctor, when consulted regarding rheumatism, suggests restricted diet—maybe some mineral springs—and possibly some medicinal treatment. Sometimes this method of treatment gives relief; more frequently it does not. Two or three opinions have been advanced by the profession as to the cause of rheumatism. Some say it is a blood trouble; others that it is a nervous affection, a broken-down and anemic condition of the system, while the third theory claims—in a vague manner—its origin to be a neuralgic affection. However, sufferers care very little about the causes of rheumatism. What they want is real relief for all time from their pain and agony.

The specialist who originated Prescription C-2223 made a very careful study of rheumatic diseases. He found that certain drugs seemed to have a more favorable effect and yield better results than others. However, some of these medicinal ingredients which he used had already been found to be of great value in the treatment of rheumatic troubles. After years of patient study and investigation, and experience in the treatment of many hundreds of sufferers, this specialist finally perfected his treatment (now known as Prescription C-2223), which he continued to use in his practice with the most wonderful results.

Prescription C-2223 stands for the very best that medical learning, research and investigation can offer you. If there is anything that modern medicine can do towards perfecting relief, Prescription C-2223 should give the desired results to all who suffer from rheumatism, gout, lumbago and sciatica.

In the treatment of rheumatic conditions, it is very necessary to keep the liver active and the bowels open. 2223 Liver Pills were prepared especially to be used with liquid Prescription C-2223 and will be found to be a pleasant purgative. One pill is a dose and three or four are all that need be taken in one week to stimulate the secretions of the liver and keep the bowels in a healthy condition.

The manufacturers have so much faith in the merit of Prescription C-2223 and are so certain that it will benefit you, that they make this guarantee: If you suffer from rheumatism, gout, lumbago or sciatica, go to your nearest druggist. Buy two \$1.50 bottles Prescription C-2223. Take the treatment according to directions, following suggestions as to diet and so on, and if you do not get satisfactory relief after using the two bottles, sufficient to justify continuing the treatment, take the empty bottles back to your druggist and he will refund you the \$3.00 which you paid for the two bottles.

Prescription C-2223, \$1.50 size, is sold and guaranteed by all good druggists, or the 2223 Laboratory, Memphis, Tenn., will send the complete liquid treatment, 2 bottles, and a package of Liver Pills postpaid on receipt of \$3.25. Write for leaflet, sample of 2223 Liver Pills and book of information.
